

## **Myth: You Don't Need Life Insurance When You're Young Transcript**

### **Scene 1**

Welcome to... Myth Squashers!  
Are you ready to squash some myths?

### **Scene 2**

Hey, careful with those fries.  
Myth #1: It's okay to follow the "five-second rule."  
Squash that myth!  
Truth is, fallen food can pick up a lot of bacteria in five seconds.

### **Scene 3**

Myth #2: Life insurance isn't important when you're young.  
Squash that myth!

### **Scene 4**

There are actually a few good reasons to get life insurance in your 20s or 30s  
Rates are usually based on age, so you can pay less than older people.  
And if you wait to apply when you're older, health issues might get in the way of your acceptance.  
By getting life insurance when you're young and healthy, you can renew your coverage at the end of each term without having to worry about changes in health affecting your coverage.

### **Scene 5**

Remember, don't let myths squash you!  
Let the Myth Squashers squash them for you.
